lation from a Republican source.

In the Constitutional Convention he took a firm stand in favor of the people and against corporate greed. He also obtained the passage of a section in the Constitution doing away with double taxation, and made a fight for such a provision in the late Legislature, his amend-ment being adopted and passed by the Senate, but defeated in the House for rea-

In 1890 William McKinley was burned in effigy in the English manufacturing city of Sheffield; but in 1894 William L. Wisson was dined and wised in London because he is the author of a Free-trade Tariff Bill. These are eignificant facts.

Right you are, old man! You're "onto" it for once in your life. The tofuny part, however, is that because you thought it necessary to call in a witness to prove it.

THE Gorman-Wilson Tariff Bill is mighty good for Canadian inmbermen. The St. John (N. F.) correspondent of The Northwestern Lumberman says: enough to make inmore to suit the New order. Water 19 of the New Order was a contract of the N ments to shippers. DEMOCRATIC Tariff tinkering, says The Ironton Republican, cost the wage earn-ers in nineteen Ironton establishments iast year over \$30,000. In other words the nineteen industries paid over \$30, the nineteen inquestres paid over \$33.

OO less in wages during 1893 than they
did in 1892. In 2,394 establishments in
Obio, representing 100,000 employes, the
iose in wages was \$6,833,516. This represents about one-third of the laboring
men of the state and shows that the ioeses in wages to this class of people alone is about \$21,000,000, when com alone is about \$21,000,000, when com-pared with 1892. The present year when completed will show a greater lose than did last and it can safely be said that Democracy costs the wage workers

of Ohio upwards of \$20,000,000 annuaity

ACCORDING to The Mining Jonrnai of London Free-trade makes higher prices. It says: "On tinplates the American dnty has been reduced to nearly one-half, or from 2 2-10 cents per pound to I 1-10 cents per pound, and this reduction is to come into operation on October 1st, aithough in all other classes the new duties take effect at once. The reduction should lead to a marked revival of prosperity at the tinplate works. Many of the milis in Wales which are now closed will be reopened and largely augmented. Transatiantic demand is certain to be experienced, consumers having for some time past been keeping stocks at the lowest possible point. Already prices on the tinplate market have risen 6 pence per box, and many makers are holding out for an advance of 1 shilling."

In a report to the Department of State S. Consni GORMAN, at Matamoras, says the effect of the new American Tar-iff is being feit in increased trade with Northern Mexico. Large exportations of dressed hides, mnles, horses, &c., have been added to the usnai exports heretofore made, and the prospect for a herectore mass, and the prospect for a large spring business is most cheering. Under the operation of the McKinley Act all live stock ceased to be exported, the Tariff on horses and mules being \$30 each, from two or three times the seiting value of the animals in Mexico. This amounted to a total prohibition, and until September 1st not a live animal of any description had been exported. Large exportations of dressed hides and leather show another new fea-ture that shares the benefit of the Wiison schedule. It should not be forgotten that Matamoras is in Mexico, and that this "increased trade" is that of Mexico, which is now pushing her products into this country to displace American pro
